av4n you need to choose the right output driver, vga or ati. the default driver is for onboard graphic chips only well all the one's i'm used to are blank and only take input, i'm not too bothered about a full desktop x3F_: what do i have to do to get Ubuntu to boot from USB? freebit[m] how did you make the bootable usb? x3F_: using unetbootin (I think that is the only tool for windows) x3F_: here is a link: did you uncheck the "copy files" option? freebit[m] is your bios set to boot from USB? x3F_: where is that? otherwise it won't make it freebit[m] and your bios is set to boot from USB? x3F_: yes yes freebit[m] unetbootin has a site with step by step info on how to install the.iso to a usb thumb drive x3F_: but i have read something about I need to disable secure boot or something like that. I will search that freebit[m] x3F_: I am able to do the whole process on my liveusb without any problem. freebit[m] you should start from the basic steps x3F_: thanks I am trying it now x3F_ is right, what is your issue? 82157476af
